Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

This is the second Office Action corresponding to Nov 15, 2005. The application contains 23 claims, numbered 6-28. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The terminal disclaimer filed on Nov 30, 2005 disclaiming the terminal portion of any patent granted on this application has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 6, 9-11, 14-18, 21, 22, 24, 25, 27 and 28 are rejected under 35

U.S.C. 102(e) as being anticipated by Krauska et al. (Pat No 6,363,556).

The patent to Krauska et al. discloses a platform capable of supporting a desktop base, or desktop housing, comprising a generally flat base, rotating elements (wheels), and resistance elements (110) activated by a lever means (5), wherein when activated the rotating means are not in contact with the supporting surface. The base has an opening wherein the stem of the wheels is inserted.

Claim Rejections - 35 USC § 103

Claims 19, 22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krauska et al.

The device shown by Krauska et al. shows wheels as the rotating element but it would have been obvious to those skilled in the art at the time the invention was made to have used cylindrical, spherical, or combination as an obvious matter of expediency. All these rotating elements are mechanical equivalents since all provide the same results.

Allowable Subject Matter

Claims 7, 8, 12, 13, 20 and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yonohara (5,588,500) shows a device of interest.
